

Geological Sciences Seminars

SAN DIEGO STATE UNIVERSITY

SPRING 2005 LECTURE SERIES — 1:00-2:00 pm in CSL-422

Feb 9	Serial, High-resolution, Multibeam Bathymetry of Monterey Canyon and the Continental Margin: Turbidity Currents, Sand Waves and a Geologic Paradox	Douglas Smith CSU Monterey Bay
Feb 16	Mantle Plumes and Magma Chambers: Case Studies of Hawaiian Volcanoes	Aaron Pietruszka SDSU
Feb 23	Flowpaths: the key to unlocking hydrochemical responses in watersheds.	Laura Rademacher CSU Los Angeles
Mar 2	Nitrate Pollution in the Rainbow Creek Watershed	Kathy Thorbjarnarson SDSU
Mar 9	Measurements of Tectonic Deformation on the Pacific Coast, Mexican Subduction Zone	Teresa Ramirez-Herrera William Lettis and Associates, Inc.
Mar 16	Fast Winds and Cold Water: California's Wind Driven Upwelling	Clive Dorman SDSU
Mar 23	Distribution of Dissolved Nutrients in Seawater at Deception Island, Antarctica	Anne Sturz USD
Apr 6	The Importance of Stratigraphic Variation on Ground Water Flow	Dave Huntley SDSU
Apr 13	TBA	TBA
Apr 20	Aseismic Creep on the Superstition Hills Fault	Rob Mellors SDSU
Apr 27	TBA	TBA
May 4	TBA	TBA
